For successful applications a scientist, working on subjects relevant to the PhD thesis of the student, will be identified in the Trieste Institutions, to tutor the student and thus to act as a co-supervisor during his/her stay in Trieste. The thesis work will be coordinated between the home supervisor and the co-supervisor. It is thus important for the supervisor and the cosupervisor to get in touch before the fellowship begins. The STEP office is responsible for providing the relevant data (e-mail, ph.nrs, addresses) to enable this contact. Joint meetings of the supervisor with the co-supervisor and the student are highly desirable.

The STEP fellowship is meant to begin after the first contact between supervisor and co-supervisor has taken place.
